

For Immediate Release:

ENCORE SOFTWARE SUCCESSFULLY COMPLETES THE IMS FORUM PLUGFEST™ II INTEROPERABILITY EVENT

Bangalore, India – 26 June 2007 – Encore Software Ltd, a leading VoIP supplier, announced today that it successfully participated in the IMS Forum's IMS Plugfest™ II interoperability test event that was held June 4-8 at the University of New Hampshire InterOperability Lab in Durham, NH. Encore tested its integrated UE implementation for IMS Forum test plan compliance.

Mr. Kaushik V. Shah, General Manager, Technology Solutions, Encore Software says, "Encore has, over a decade of, experience in developing field proven signal processing components and protocol stacks for VoIP/FoIP (fax over IP) solutions, and, has been licensing these IPs to semiconductor and integrated middleware suppliers and equipment manufacturers world-wide. The IMS Forum's Plugfest has proven to be the ideal forum for Encore to confirm the interoperability of our integrated offerings, beginning with UE, in the context of IMS".

The IMS Plugfest II is the second in a series of open testing events that are designed to foster interoperability by establishing an industry-recognized Interoperability certification for IMS services and applications. The Plugfest testing events are creating industry-recognized interoperability test plans for IMS applications and services, allowing service providers to expedite IMS service rollout. The first Plugfest focused on interoperability of the IMS transport layer. Building on Plugfest I, Plugfest II tests interoperability for VoIP, IP Centrex, SMS and Fixed-Mobile Convergence functionality.

"We are pleased to have Encore Software participate in our second Plugfest," said Michael Khalilian, IMS Forum Chairman & President. "Industry leaders like Encore Software are making great strides in furthering IMS technologies, applications and services through their participation in our interoperability testing."

Encore is bringing IMS enhanced UE implementation to the IMS Plugfest II. Encore looks forward to verifying interoperability of voice, fax, IM and presence features of its UE over UDP / TCP / TLS transports using IPv4 / IPv6 addressing.

About Encore Software Ltd:

Encore Software is a pioneer in developing technological solutions in DSP based Modems, Speech Coders, VoIP Protocol Stacks, and System Design Services in the Embedded Systems area. These products and services are the critical building blocks for OEM products which address the Internet, Telecommunication and Consumer Electronics Industries.

Encore also designs and manufactures hand held devices for niche application areas of defense, e-governance, education and information access on the move. These include - Simputer, SATHI and Mobilis. Simputer is deployed in e-governance applications, SATHI is deployed by Indian Army and Mobilis is a new and improved Simputer with GSM/GPRS and WiFi connectivity, larger screen and more processing power while retaining low power consumption.

About the IMS Forum:

The IMS Forum® is a global, non-profit industry association devoted to interoperable IP Multimedia Subsystems services and solutions. IMS Forum's mission is to accelerate the interoperability of IMS applications and services, enabling enterprise and residential consumers to quickly benefit from the delivery of quadruple play voice, video, internet and mobile services over broadband via cable, wireless and fixed networks. The IMS Forum is the creator and organizer of the IMS Plugfest™, the industry's only event focused on IMS services interoperability verification and certification.

Through its organized Plugfests, working group interaction, and other activities, forum members are able to develop cost-effective technical frameworks for converged IP services over wireline, cable, 3G, WiFi and WiMAX networks. Plugfest III will be held October 15-19, 2007 at the IMS Forum UNH Interoperability Lab. For additional information or to join the IMS Forum and the IMS Plugfest, please visit www.IMSForum.org.
